MAKE THE NEXT ROOM A WORLD AWAY

New home buyers are actively engaged in selecting upgrade options for their home such as marble benchtops. However they are often unaware of insulation upgrade options and the thermal and acoustic benefits that they provide. The best time to upgrade your insulation is during the construction stage of a new build as it is often too late to install insulation once the plasterboard is fixed.

BENEFITS TO YOUR CLIENTS

Help your clients love the sound of silence by specifying and installing Pink® Soundbreak® insulation.

Pink® Soundbreak® reduces room to room noise transfer. As thermal and acoustic insulation, it also keeps your clients warmer in winter and cooler in summer; and reduces energy usage saving them money.

Install Pink® Soundbreak® insulation in external and internal walls, ceilings and between floors.

Protect living spaces from unwanted noise so everyone can live in peace and quiet under the same roof.

EASY FOR YOUR INSTALLER

Firm fit, Less itch

Pink® Soundbreak® insulation is firm - making it quick and easy to install and ensuring it remains in place for ongoing thermal and acoustic performance. Thanks to advances in formulation, Pink® Soundbreak® insulation is low itch - making it comfortable to handle.

IDEAL FOR EXTERNAL WALLS, INTERNAL WALLS, CEILINGS AND BETWEEN FLOORS

REDUCES ROOM TO ROOM NOISE TRANSFER

KEEPS YOUR CLIENTS WARMER IN WINTER AND COOLER IN SUMMER

REDUCES ENERGY USAGE SAVING MONEY

LOVE THE SOUND OF SILENCE
